CONSERVATION MEASURE 2/III Mesh Size (as amended in accordance with Conservation Measure 19/IX)

1. The use of pelagic and bottom trawls having the mesh size in any part of a trawl less than indicated is prohibited for any directed fishery for:

Notothenia rossii, Dissostichus eleginoides - 120 mm Notothenia gibberifrons, Notothenia kempi, Notothenia squamifrons - 80 mm

- 2. It is prohibited to use any means or device which would obstruct or diminish the size of the meshes.
- 3. This Conservation Measure does not apply to fishing conducted for scientific research purposes.
- 4. This Measure will apply as of 1 September 1985.
