

CONSERVATION MEASURE 81/XIII
Effort and Biological Data Reporting System for *Dissostichus eleginoides*
in Statistical Subareas 48.3 and 48.4 for the 1994/95 Season

This Conservation Measure is adopted in accordance with Conservation Measure 7/V:

1. At the end of each month each Contracting Party shall obtain from each of its vessels the haul-by-haul data required to complete the CCAMLR fine-scale catch and effort data form for longline fisheries (Form C2, latest version). These data shall include numbers of seabirds or marine mammals of each species caught and released or killed. It shall transmit those data to the Executive Secretary not later than the end of the following month.
2. At the end of each month, each Contracting Party shall obtain from each of its vessels a representative sample of length composition measurements from the fishery (Form B2, latest version). It shall transmit those data to the Executive Secretary not later than the end of the following month.
3. For the purpose of implementing this Conservation Measure:
 - (i) length measurements of fish should be of total length to the nearest centimetre below; and
 - (ii) representative samples of length composition should be taken from a single fishing ground¹. In the event that the vessel moves from one fishing ground to another during the course of a month, then separate length compositions should be submitted for each fishing ground.
4. Should a Contracting Party fail to transmit the fine-scale catch and effort data or length composition data to the Executive Secretary by the deadline specified in paragraph 2, the Executive Secretary shall issue a reminder to the Contracting Party. If at the end of a further two months those data have still not been provided the Executive Secretary shall notify all Contracting parties of the closure of the fishery to vessels of the Contracting Party which has failed to supply the data as required.

¹ Pending the provision of a more appropriate definition, the term fishing ground is defined here as the area within a single fine-scale grid rectangle (0.5° latitude by 1° longitude).
