

CONSERVATION MEASURE 221/XX
Limits on the Fishery for *Dissostichus eleginoides*
in Statistical Subarea 48.3 in the 2001/02 Season

The Commission hereby adopts the following conservation measure in accordance with Conservation Measure 7/V:

- | | |
|-------------|---|
| Access | 1. The fishery for <i>Dissostichus eleginoides</i> in Statistical Subarea 48.3 shall be conducted by vessels using longlines and pots only. |
| Catch limit | 2. The total catch of <i>Dissostichus eleginoides</i> in Statistical Subarea 48.3 in the 2001/02 season shall be limited to 5 820 tonnes. |
| Season | 3. For the purpose of the longline fishery for <i>Dissostichus eleginoides</i> in Statistical Subarea 48.3, the 2001/02 season is defined as the period from 1 May to 31 August 2002, or until the catch limit is reached, whichever is sooner. For the purpose of the pot fishery for <i>Dissostichus eleginoides</i> in Statistical Subarea 48.3, the 2001/02 season is defined as the period from 1 December 2001 to 30 November 2002, or until the catch limit is reached, whichever is sooner. |
| By-catch | 4. The by-catch of crab shall be counted against the catch limit in the crab fishery in Statistical Subarea 48.3.

5. The by-catch of finfish in the fishery for <i>Dissostichus eleginoides</i> in Statistical Subarea 48.3 in the 2001/02 season shall not exceed 291 tonnes for skates and rays and 291 tonnes for <i>Macrourus</i> spp. For the purpose of these by-catch limits, skates and rays shall be counted as a single species.

6. If the by-catch of any one species is equal to or greater than 1 tonne in any one haul or set, then the fishing vessel shall move to another location at least 5 n miles ¹ distant. The fishing vessel shall not return to any point within 5 n miles of the location where the by-catch exceeded 1 tonne for a period of at least five days ² . The location where the by-catch exceeded 1 tonne is defined as the path followed by the fishing vessel from the point at which the fishing gear was first deployed from the fishing vessel to the point at which the fishing gear was retrieved by the fishing vessel. |
| Mitigation | 7. The operation of this fishery shall be carried out in accordance with Conservation Measure 29/XIX so as to minimise the incidental mortality of seabirds in the course of fishing. |
| Observers | 8. Each vessel participating in this fishery shall have at least one scientific observer appointed in accordance with the CCAMLR Scheme of International Scientific Observation, and where possible one additional scientific observer, on board throughout all fishing activities within the fishing period. |

- Data: catch/effort
9. For the purpose of implementing this conservation measure in the 2001/02 season, the following shall apply:
 - (i) the Five-day Catch and Effort Reporting System set out in Conservation Measure 51/XIX; and
 - (ii) the Monthly Fine-scale Catch and Effort Reporting System set out in Conservation Measure 122/XIX. Fine-scale data shall be submitted on a haul-by-haul basis.
 10. For the purpose of Conservation Measures 51/XIX and 122/XIX, the target species is *Dissostichus eleginoides* and by-catch species are defined as any species other than *Dissostichus eleginoides*.
 11. The total number and weight of *Dissostichus eleginoides* discarded, including those with the 'jellymeat' condition, shall be reported. These fish will count towards the total allowable catch.
- Data: biological
12. Fine-scale biological data, as required under Conservation Measure 121/XIX, shall be collected and recorded. Such data shall be reported in accordance with the Scheme of International Scientific Observation.
 - ¹ This provision concerning the minimum distance separating fishing locations is adopted pending the adoption of a more appropriate definition of a fishing location by the Commission.
 - ² The specified period is adopted in accordance with the reporting period specified in Conservation Measure 51/XIX, pending the adoption of a more appropriate period by the Commission.
