

HISTORY OF CONSERVATION MEASURES AND RESOLUTIONS

Measures and resolutions currently in force are indicated by X and their identification numbers are given under 'History'. Measures adopted under the old numbering system are given in brackets, with measures renumbered in 2002 indicated by a double asterisk (**). Each measure or resolution has one or more time series of historical events. The beginning of each series of events is identified by a single asterisk (*). The year following the asterisk is the year of the meeting where a particular measure or resolution was adopted. If the only event in the series is the year of adoption, then that particular measure or resolution was in force for a single year only. Other events in a series indicate the year of the meeting when that measure or resolution was revised or lapsed or was rescinded. The period when the measure or resolution was carried forward is indicated by a stippled line (...).
