

CONSERVATION MEASURE 87/XIII
Limitation of Total Catch of *Lepidonotothen squamifrons*
in Statistical Division 58.4.4 (Ob and Lena Banks)
in the 1994/95 and 1995/96 Seasons

1. The total catch of *Lepidonotothen squamifrons* for the entire two year period shall not exceed 1 150 tonnes, which shall be made up of 715 tonnes on Lena Bank and 435 tonnes on Ob Bank.
2. The two year period shall be from 5 November 1994 to the end of the Commission meeting in 1996.
3. For the purpose of implementing this conservation measure:
 - (i) the Five-day Catch and Effort Reporting System set out in Conservation Measure 51/XII shall apply in the period 1994 to 1996 commencing on 5 November 1994;
 - (ii) the Monthly Effort and Biological Data Reporting System set out in Conservation Measure 52/XI shall apply for the target species *Lepidonotothen squamifrons*, and the by-catch species *Dissostichus eleginoides* commencing on 5 November 1994;
 - (iii) data on the numbers of seabirds of each species killed or injured in incidents involving the net monitor cable shall also be reported to the Commission;
 - (iv) age frequency, length frequency and age/length keys for *Lepidonotothen squamifrons*, *Dissostichus eleginoides* and any other species forming a significant part of the catch shall be collected and reported to each annual meeting of the Working Group on Fish Stock Assessment for each Bank separately on forms B2 and B3; and
 - (v) the fishery for *Lepidonotothen squamifrons* will be subject to review at the 1995 annual meetings of the Scientific Committee and the Commission.
4. Each vessel participating in the fishery in Statistical Division 58.4.4 in the 1994/95 and 1995/96 seasons shall have a scientific observer, appointed in accordance with the Scheme of International Scientific Observation of CCAMLR, on board throughout all fishing activities within the fishing period.
