

CONSERVATION MEASURE 72/XVI
Prohibition of Directed Fishing for Finfish other than
Longlining for *Dissostichus* spp. in Statistical Subarea 48.1

Taking of finfish, other than for scientific research purposes, with the exception of longlining for *Dissostichus* spp. in waters deeper than 600 m in accordance with Conservation Measure 134/XVI, is prohibited in Statistical Subarea 48.1 from 8 November 1997 until at least such time that a survey of stock biomass is carried out, its results reported to and analysed by the Working Group on Fish Stock Assessment and a decision that the fishery be reopened is made by the Commission based on the advice of the Scientific Committee.
