

RESUME DES ACTIVITES DE RECHERCHE DES MEMBRES  
LIEES AU CONTROLE DE L'ECOSYSTEME

RESUME DES ACTIVITES DE RECHERCHE DES MEMBRES  
LIEES AU CONTROLE DE L'ECOSYSTEME

Contenu

Les tableaux 1 - 4 montrent les programmes en cours ou envisagés pour le contrôle, ou les recherches dirigées visant à évaluer l'utilité de paramètres de contrôle potentiels. Les catégories selon lesquelles les diverses réponses nationales sont réparties sont celles qui ont été identifiées comme les plus importantes lors de la Réunion du Groupe de travail chargé du Programme de contrôle de l'écosystème de la CCAMLR (Annexe 6). Les catégories figurent à l'Annexe 6, Tableau 2 (prédateurs), Tableau 6 (milieu) Figure 2 (proies) et Tableau 3 (programmes de recherche sur les prédateurs). Les études futures de contrôle et de recherche portant sur les proies et sur le milieu étaient similaires à celles identifiées au Tableau 1 et, par conséquent, n'ont pas été reproduites aux Tableaux 2 - 4.

Le Tableau 5 fournit des renseignements sur les dates et lieux d'opération des croisières de recherche et des activités menées à partir de bases terrestres.

Table 1 Monitoring Programs for the Current Season (1986/87)

Species and Parameters*	Arg	Aust	Brazil	Chile	France	FRG	GDR	Japan	Korea	NZ	Poland	S.Afr	USSR	UK	USA
